improving indoor air quality for everyone

IAQA 2016 CALL FOR PRESENTATIONS

IAQA has issued a Call for Presentations for its 19th Annual Meeting, to be held at the Loews Royal Pacific Resort in Orlando, Florida, from January 24 – 27, 2016. Presentations are specifically requested on: IAQ assessment strategies; moisture measurement in materials; interpretation of laboratory analytical results; principles of developing a sample strategy; methods and best practices for IAQ contractors; building sciences; and, interaction with other professionals on multidisciplinary teams. Presentations are also welcome on other topics related to indoor environments, including business management topics. Particular emphasis is given to mold-related presentations, including moisture intrusion, safety, report writing and standards of practice. Presentations at the IAQA Annual Meeting must be strictly non-commercial. Speakers of accepted presentations will need to confirm their participation prior to final scheduling.

CALL FOR PRESENTATIONS

The deadline for Call for Presentations submittals is **June 1, 2015**. Persons interested in giving technical presentations must submit an abstract no more than 400 words in length that gives the title of the presentation, a brief description of its contents and references cited. Submittals must also include the speaker's biography. Presentation times will be 50 minutes in length. Final selections will be made by IAQA by **July 15, 2015**, and submitters will be notified by **August 1, 2015**. Selected speakers will be given complimentary discounted admittance to the Annual Meeting. Please note that those selected will be required to submit final presentation slides to IAQA by **November 1, 2015**. All material presented at IAQA must be substantiated by scientific literature citations, where available. In subject areas lacking research, presenters shall clearly state what source(s) the presentation material is based upon or note that the presentation is based on their experience. Written permission must be obtained for any copywritten material used in conjunction with the submitted presentation. Presenters must clearly declare any competing interests at the beginning of their presentation.

CONFERENCE WORKSHOPS

Conference training workshops 4 hours in length will be included in the 2016 conference program. IAQA is seeking abstract submittals for these workshops as well. These workshops should provide advanced training in the theory and practice of a topic relevant to indoor air quality, including HVAC and building science. Proposals will be considered for both basic and advanced workshops, though there is a preference for advanced workshops. Proposals should include: a) Statement of Need; b) specific learning objectives; and, c) an outline of the subject material. The source of all material presented at IAQA must be identified as described above (personal experience, published literature or other source) and declaration made of any competing interests. The deadline for submittals is no later than **June 1, 2015**.
